

Hi [Name],

In an era where artificial intelligence is reshaping industries, the workplace isn't far behind. But what happens when AI intersects with HR policies, company privacy, and confidentiality?

With the rising popularity of ChatGPT, many business owners are concerned about employees using AI tools for work on the sly. In some cases, employees might be entering sensitive company data into a third-party open platform without the employer's consent.

It becomes important then that employers develop effective policies to address and manage the use of AI tools – especially when company confidentiality may be at risk.

Join me and my colleague – Olivia Cicchini – at our FREE webinar and learn how to manage tech, social media, and AI in the workplace.

At the webinar, you'll learn:

- The positives and negatives of AI in the workplace
- What to include in your workplace social media and AI policy
- Industries most affected by AI & how to manage the use of AI tools
- Other best practices on tech and social media use at work
- The future of tech and social media in employment
- And more...

Attend our FREE webinar – Managing Tech and Social Media at Work  
Wednesday, September 13 at 1pm PDT | 2pm MDT

Don't miss out, spots are limited.
